

..Could this Be YOU!

Line of fire

Using a retractable blade knife.

The knife slipped and cut the worker.

Could you ever do anything like this?

How could you prevent it?

hands

...too precious to lose.

Could this Be YOU!

Do you ever do this at work or home?

How could you prevent an injury?

hands

...too precious to lose.

...Your Hands

Hands

***What do
you use
them for?***

***How could
they be
harmed?***

***How can
you
prevent it?***

***What will
YOU do
about it?***

hands

...too precious to lose.

Hand Tool Safety

- Use the right tool for the job
- Don't use broken tools
- Cut away from your body
- Secure grip and footing
- Use a tool belt or box
- Keep tool secure at height
- Use the right PPE for the job
- Store tools properly
- Keep tools dry to prevent rust

hands

...too precious to lose.

Pinch Points

- **Keep out of the line of fire**
- **Keep hands where you can see them**
- **Beware near automated equipment**
- **Don't remove safety guards**
- **LOTO for repair or maintenance**
- **Through doors keep hands safe**
- **Wear gloves moving heavy equipment**

hands

Line of Fire

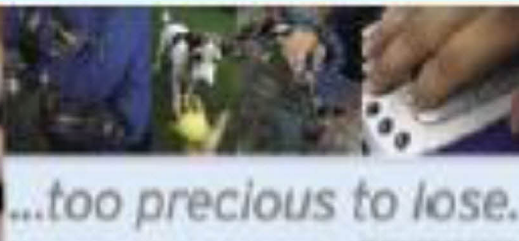

Using a wheel "key"

The worker broke his thumb

Could you ever do anything like this?

How could you prevent it?

hands

...too precious to lose.

Line of Fire

Holding a scaffold tube wrongly.

The worker fractured his little finger.

Could you ever do anything like this?

How could you prevent it?

hands

...too precious to lose.

Pinch Points

Working in an awkward position.

The tool slipped and trapped the workers hand.

Could you ever do anything like this?

How could you prevent it?

hands

...too precious to lose.

Gloves

***Are you
wearing the
right gloves
for the job?***

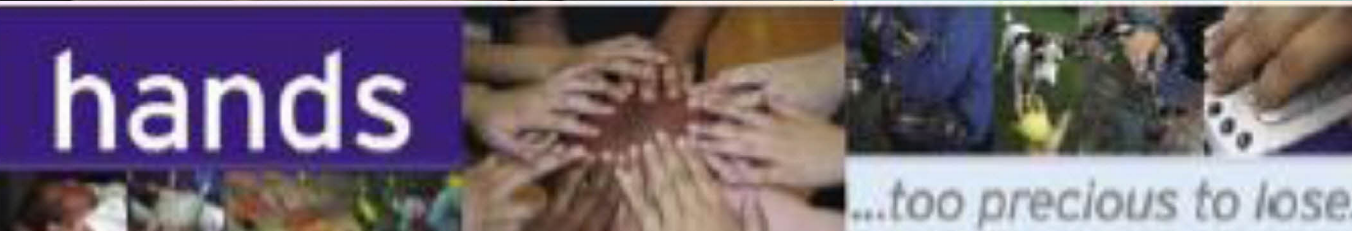

***Are there any
safer ones
you could
use?***

***Is there a JLA
for the job?
Do they
match the
JLA?***

***Are they worn
or damaged?***
